

## AIA MEMBER SPOTLIGHT

# LyonsPlain Architecture

LyonsPlain Architecture (LPA) is a multi-disciplinary architecture firm specializing in cultural, hospitality, adaptive reuse and historic preservation design.

Our design approach is to blur the boundaries between disciplines by cross-pollinating architecture and design with art and lifestyle to create beautifully proportioned, meticulously detailed, well-executed spaces that will be loved and that will bring lasting value to the individuals they serve. We are not committed to a specific style, but rather focus on the uniqueness and the distinctive qualities of each place. We believe the best design solutions work with the surrounding environment rather than against it and are committed to the creation of sustainable and livable environments and buildings.

Our key advantage is the firm's diverse knowledge and experience in various building types and scales, and in all phases of project planning, development, and construction. From programming and feasibility to product design

and branding (and everything in between), we adapt our process to match client's expectations and individual needs.

Our small hands-on team is comprised of highly talented professionals who offer creative solutions through a collaborative and client-centered approach. With close to 20 years of professional experience, we provided our services to a diverse group of clients locally and nationally. Our design experience includes museums and libraries, learning and community environments, hotels and resorts, mixed-use commercial spaces, and custom single-family residences. You can find our award-winning featured in numerous press publications, magazines, and online platforms.
